**Election/Restriction**

**1.** Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. **Claims 1-4**, drawn to a dicing tape applying apparatus, classified in class 156, subclass 363.
- II. **Claims 5 and 7-10**, drawn to a dicing tape applying apparatus, classified in class 156, subclass 540.
- III. **Claims 6 and 11**, drawn to a back-grinding/dicing tape applying apparatus, classified in class 156, subclass 517.

**2.** The inventions are distinct, each from the other because of the following reasons:

Inventions III and I/II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because (I/III) the combination does not require cutting, and the subcombination has separate utility such as applying tape to a diaper; (II/III) the combination does not require the stage, and the subcombination has a separate utility such as applying protective tape to a window glass.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as applying tape to a diaper. See MPEP § 806.05(d).

**3.** Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

**Art Unit: 1734**

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
